

## Introducing NEBA

NEBA® is the first brainwave-based ADHD test cleared by FDA. NEBA helps to answer the question: **Is it ADHD or something else?**

Your clinician's office can perform NEBA. It is a safe and comfortable procedure that takes 15 to 20 minutes.

To use NEBA, your clinician still performs their regular evaluation. If your clinician determines that ADHD-like symptoms are present, NEBA helps to determine whether the symptoms are due to another condition.

NEBA uses a validated biological measure of brainwave activity. Research supports that including NEBA improves certainty about ADHD.

Some children may have ADHD symptoms that are actually due to other conditions. NEBA helps the clinician to identify these children. NEBA supports the clinician's decision to perform further testing with these children, which may clear up whether a different diagnosis is needed. **Children are more likely to receive the care they need.**

# HELLO WORLD!

A biomarker that helps with your child's ADHD assessment!

MRK0038/2014.09.30

*“the study results showed that the use of the NEBA system aided clinicians in making a more accurate diagnosis of ADHD...” -- FDA*

## What is NEBA?

NEBA is a biological test to support ADHD evaluations.

FDA says this new information may help clinicians more accurately diagnose ADHD.

Once a clinician identifies ADHD-like symptoms, NEBA helps the clinician to determine whether the symptoms are due to another condition.

In other words, NEBA offers new technology to help answer the question: **What is causing the symptoms... ADHD or something else?**

## How does NEBA Work?

Your clinician's office records your child's brainwaves using a simple cap. The procedure is comfortable and safe. It takes about 15 to 20 minutes.

Your clinician still performs their regular evaluation for ADHD. Using your clinician's initial diagnosis and the brainwave recording, NEBA Health performs analyses and creates a report for your clinician. The report helps your clinician to improve certainty about ADHD.

The report is returned in about an hour.

## Getting Started

To get started, you create a MyNEBA account.

Your clinician first gives you a **Key Code**. You go to [www.myneba.com](http://www.myneba.com) or download the NEBA Health app from Google Play. You enter some basic information, like your child's age, which is needed to run NEBA.

**Creating a MyNEBA account is free.** Your account is only charged if your clinician uses NEBA and brainwave data is analyzed by NEBA Health.
